Make Training Realistic

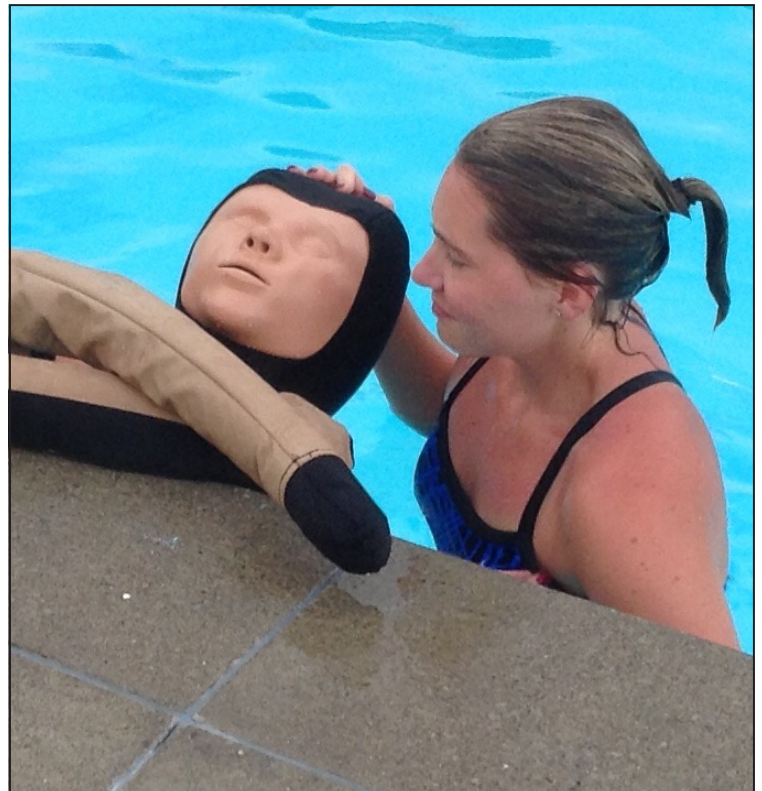

Pool Rescue Manikin

This manikin has been designed in consultation with the royal Life Saving Society UK (RLSS) and is a revolutionary new product which allows trainee lifeguards to learn vital skills.

Once thrown into the pool, the manikin quickly sinks beneath the surface and lifeguards can train to retrieve it from the bottom, tow it to the side using a variety of towing techniques, and perfect their lifting techniques – all using one dummy, instead of switching between plastic torsos and live volunteers.

Pool Rescue Manikin

IDEAL FOR THE FOLLOWING TRAINING SCENARIOS:

This product brings together different elements of lifeguard training, allowing trainees to seamlessly practice different techniques without needing to switch between equipment or live volunteers. This lifeguard training manikin is the ideal tool for all leisure centres, swimming pools and clubs.

FEATURES & BENEFITS:

- Carefully designed and tested to create realistic buoyancy - it will sink, yet is buoyant enough to float when being towed. It will feel like an 'unconscious' person in the water.
- A more realistic challenge compared to using live volunteers who may try to subconsciously 'assist' the trainee.
- The use of a manikin can reduce the need to use volunteers in training scenarios, thereby avoiding potential injury and any embarrassment caused by close personal contact.
- Flexible arms, reinforced with strong webbing allow the arms to be raised aloft, letting lifeguards practice hauling the 'victim' from the water using correct lifting techniques.
- Constructed using a reinforced Nylon mesh which allows water ingress, meaning the manikin will sink when placed in water.
- Detailed care instructions will be provided with the manikin.

USED AND ENDORSED BY:

Royal Life Saving Society UK (RLSS)

Manikin package includes mesh carrying/drying mat.

TESTIMONIALS

The Pool Rescue Manikin has the most life-like attributes that I have seen in any training tool. It sinks quickly, and positions itself in the pool like a real person would . . . it makes practicing skills and techniques more realistic and meaningful to the lifeguard.

Alisha Gee - Canadian Lifeguard

This training tool would be useful in all pool settings – indoor or outdoor – and for multiple training techniques. I look forward to working and training with the Pool Training Dummy in the future!
